1. Claims 4, 6-12, 15 and 18-23 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species and invention, there being no allowable generic or linking claim. Election was made without traverse in Paper Nos. 5 and 8.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
3. Claims 1, 2, 5, 13, 14, 16 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by any of Bauer et al or Pollack et al or Tarzwell et al or Gen-Kuong et al.
4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over any of Bauer et al or Pollack et al or Tarzwell or Gen-Kuong et al.

To make the pin of each reference square would have been an obvious matter of design.
6. The references cited on Form 892 disclose similar spring probe tips.
